Table of Contents

User stories are organized sequentially in this document.

1. [US-001] User Login with Email and Password

Epic: User Authentication System | **Feature:** Login and Password Management

Story ID	Priority	Story Points	Status
US-001	HIGH	5	■ Has Risks

Description

As a registered user, I want to log in to the system using my email and password so that I can access my personalized dashboard and account features.

Acceptance Criteria

- User can enter email address in the login form
- User can enter password (masked input)
- System validates email format before submission
- System authenticates credentials against database
- On successful login, user is redirected to dashboard
- On failed login, appropriate error message is displayed
- Login attempt is logged for security audit

Business Rules

- Email must be in valid format (RFC 5322)
- Password must be at least 8 characters
- Account locks after 5 failed attempts
- Session expires after 30 minutes of inactivity

Dependencies

Dependency ID	Type	Description
US-002	blocks	Depends on US-002

Risks

- API availability
- Network latency

Assumptions

- Users have stable internet

- Browser supports HTML5

Definition of Done

- ✓ Code reviewed
- ✓ Unit tests passed
- ✓ Integration tests passed
- ✓ Deployed to staging

Metadata

Field	Value
Assignee	john.doe@example.com
Created At	2026-07-10 05:34:48
Labels	has_business_rules, has_dependencies, has_risks
Confidence Score	92.00%
Business Value	Improves user experience and reduces support tickets
Persona	End User
Goal	Complete tasks efficiently with minimal friction
Source Chunks	3 chunks
Requirements	REQ-001, REQ-002

2. [US-002] Password Reset Flow

Epic: User Authentication System | **Feature:** Login and Password Management

Story ID	Priority	Story Points	Status
US-002	HIGH	5	■ Has Risks

Description

As a user who forgot their password, I want to reset it using my registered email so that I can regain access to my account.

Acceptance Criteria

1. User clicks 'Forgot Password' link on login page
2. System prompts for registered email address
3. System sends reset link to the email
4. Reset link is valid for 24 hours
5. User clicks link and is redirected to password reset page
6. User enters and confirms new password
7. System validates password strength
8. Password is successfully updated in database

Business Rules

- Reset link expires after 24 hours
- New password must be different from last 3 passwords
- Email must be verified before reset
- Rate limit: 3 reset requests per hour

Risks

- API availability
- Network latency

Assumptions

- Users have stable internet
- Browser supports HTML5

Definition of Done

- ✓ Code reviewed

- ✓ Unit tests passed
- ✓ Integration tests passed
- ✓ Deployed to staging

3. [US-003] User Profile Management

Epic: User Authentication System | **Feature:** Profile Management

Story ID	Priority	Story Points	Status
US-003	MEDIUM	3	■ Has Risks

Description

As a logged-in user, I want to view and update my profile information so that my account details are always current.

Acceptance Criteria

1. User can view current profile information
2. User can edit name, phone number, and address
3. System validates all input fields
4. User can upload a profile picture
5. Changes are saved to database
6. User receives confirmation message

Business Rules

- Email address cannot be changed directly (requires verification)
- Profile picture must be under 5MB
- Allowed image formats: JPG, PNG, GIF
- Phone number must be in valid format

Dependencies

Dependency ID	Type	Description
